# 1. Samenvatting

Ten behoeve van het onderwijsbeleid op gemeentelijk niveau is voor de gemeente Maastricht een prognose opgesteld van leerlingenaantallen voor de periode 2019 tot en met 2039. In de ramingen van leerlingenaantallen zijn twee ontwikkelingen verwerkt. Dit zijn de trends in de omvang van de basisgeneratie in de afzonderlijke gebieden van de gemeente Maastricht en de schoolkeuze. Bij de opzet van de prognoses zijn cijfers verwerkt met een uitsplitsing van leerlingen naar herkomstgebied.

Bij de berekeningen voor de periode 2019-2039 is gebruik gemaakt van het softwarepakket G4PRO. Dit programma voldoet aan het "Programma voor het opstellen van leerlingenprognoses" van de VNG.

De onderstaande tabel geeft een samenvatting van de belangrijkste resultaten. In de overzichten zijn de leerlingenaantallen van peildatum 1 oktober 2018 weergegeven onder 2019.

<b>Totaal</b>		<b>6540</b>	<b>6517</b>	<b>6560</b>	<b>6595</b>	<b>6601</b>	<b>6567</b>	<b>6525</b>	<b>6472</b>	<b>6601</b>	<b>6753</b>

In de vorige prognose van 2017 was een minder snelle daling verwacht. Op termijn blijft de prognose achter als gevolg van minder kinderen in de doelgroep voor het basisonderwijs.

## **2. Inleiding**

### **2.1 Doelstelling en werkwijze**

Ten behoeve van het onderwijsbeleid op gemeentelijk niveau is voor de gemeente Maastricht een prognose opgesteld van leerlingenaantallen. Deze langetermijnprognose beslaat de periode 2019 tot en met 2039 en heeft betrekking op 28 locaties voor basisonderwijs. Deze scholen betrekken leerlingen uit 18 gebieden in de gemeente Maastricht.

In de resultaten van de langetermijnprognose zijn ongewogen leerlingaantallen verwerkt. Het doel van de prognoses is het verkrijgen van inzicht in het toekomstig verloop van het aantal leerlingen.

### **2.2 Totstandkoming en opzet rapportage**

De prognose is totstandgekomen in samenwerking met de opdrachtgever. De gemeente Maastricht leverde de prognose van de bevolking en leerlingenaantallen in de voorafgaande periode. De cijfers van de leerlingen zijn uitgesplitst naar herkomstgebied.

De opbouw van het rapport is als volgt. Hoofdstuk 3 beschrijft in het kort de gehanteerde methodiek. De resultaten van de prognose van de basisgeneraties zijn weergegeven in hoofdstuk 4 en de uitkomsten van de leerlingenprognose in hoofdstuk 5.

Bijlage 1 bevat een overzicht van begrippen en afkortingen die in dit rapport voorkomen.  
Bijlage 2 toont per school de ontwikkeling van de leerlingenaantallen t/m 2033

## 3. Beschrijving van de gevolgde werkwijze

### 3.1 Werkwijze binnen G4PRO

Bij de berekeningen is gebruik gemaakt van het softwarepakket G4PRO. Dit programma voldoet aan het "Programma voor het opstellen van leerlingenprognoses" van de VNG. Het berekenen van toekomstige aantallen leerlingen gebeurt binnen G4PRO in de drie hieronder beschreven stappen.

#### 3.1.1 Herkomstgebieden

De eerste stap is het definiëren van de herkomstgebieden waaruit een school leerlingen betreft. In de praktijk wordt voor afbakening van herkomstgebieden veelal de CBS wijk- en buurtindeling gevolgd. Per school wordt het voedingsgebied berekend.

Het voedingsgebied is "die verzameling herkomstgebieden (wijken) van waaruit minimaal 70% van de leerlingen afkomstig is". Elke school heeft dus een eigen berekend voedingsgebied op basis van de waargenomen herkomst van de leerlingen.

#### 3.1.2 Basisgeneratie

De omvang van de basisgeneratie is vastgesteld op de 4 tot en met 11-jarigen plus 30 procent van de 12-jarigen. Het overige deel van de 12-jarigen stroomt door naar een school voor voortgezet onderwijs. De prognose van de basisgeneratie vloeit voort uit de demografische ontwikkelingen die zich in het verleden voordeden en de aannames over de trends hierin. Meer hierover leest u hieronder in paragraaf 3.2 GBPRO: prognosemethodiek.

#### 3.1.3 Deelname en belangstelling

Vervolgens wordt het aantal leerlingen per school geprognosticeerd. De leerlingenprognose is gebaseerd op de herkomst van leerlingen. Voor elk herkomstgebied wordt de belangstelling voor de school berekend. Op deze wijze ontstaat in de prognose inzicht in de toestroom van leerlingen per herkomstgebied.

### 3.2 GBPRO: prognosemethodiek

Het GBPRO model is een cohort-componentenmodel en een cohort-survivalmodel 0-99 jarigen.

Voor de gemeente als geheel wordt volgens de cohort-componenten methode gerekend. Hierbij worden de aantallen vestigers en vertrekkers, het aantal overledenen en het aantal geboorten berekend. Dit gebeurt door middel van de aangenomen kansen naar leeftijd en geslacht voor de hele gemeente. Deze berekende aantallen worden van de beginbevolking afgetrokken of erbij opgeteld. De vestigers worden toebedeeld op basis van de aanwezige ruimte op de woningmarkt.

Na de prognose voor de gemeente als geheel wordt de prognose per gebiedsdeel opgesteld. Deze prognose wordt gemaakt met de cohort-survival methode. Er wordt per leeftijd geanalyseerd wat het aantal inwoners is op 1-1 van een bepaald jaar. Deze worden vergeleken met de aantallen van de leeftijd plus 1 van het jaar daarop. De verkregen factor is de mutatiefactor. Op basis van de mutatiefactoren wordt vervolgens een aanname voor de toekomst gemaakt. De verdeling over de verschillende gebiedsdelen is afhankelijk van het aantal geboorten per gebiedsdeel en de woningvoorraad per gebiedsdeel. Na afronding van de prognose per gebiedsdeel worden beide prognoses naast elkaar gelegd en worden de prognoses van de gebiedsdelen gecorrigeerd naar de aantallen van de prognose voor de gemeente als geheel.

Vervolgens wordt per gebiedsdeel de prognose van de kinderen van 0 t/m 19 jaar ingevoerd in het G4pro leerlingenprognosemodel waar de 0 t/m 19 jarigen worden omgezet in basisgeneraties zijnde doelgroepen voor het basisonderwijs en het voortgezet onderwijs. In hoofdstuk 4 is de prognose van de basisgeneratie 4-12 jarigen in beeld gebracht.

### 3.3 Uitgangspunten voor de gemeente Maastricht

Na bestudering van de lokale situatie en in overleg met de gemeente is besloten de gemeente Maastricht in 18 gebieden te verdelen.

#### Wijkindeling: Maastricht

0A	Binnenstad en Kwartieren (00 tm 04)

6B	Heer (62)
6C	De Heeg, Vroendaal (63,64)

Voor alle basisscholen in de gemeente Maastricht is de belangstelling en deelname berekend en geanalyseerd. De meest recente teldatum-gegevens, die van 1 oktober 2018, vormen de basis voor de uiteindelijke leerlingenprognose.

In de volgende twee hoofdstukken worden de prognoses toegelicht.

## 4. De prognose van de basisgeneratie

In dit hoofdstuk worden de prognoses van de basisgeneratie van de gebieden gepresenteerd. De bevolkingsprognose is opgesteld door Pronexus.

	Totaal	7013	7017	7058	7066	7044	6972	6937	6919	6889	6884	6872	6874	6881	6907	6939	6969	6993	7014	7056	7092	7127	7159

De doelgroep is op 1-1-2019, 80 kinderen lager dan in de vorige prognose was verwacht. De komende jaren groeit de doelgroep licht om daarna te dalen. Op termijn na 2028 neemt de doelgroep binnen de gemeente Maastricht weer gestaag toe. Ten opzichte van de vorige prognose licht de doelgroep lager. Deze lagere doelgroep wordt voornamelijk veroorzaakt door de mindere geboorte aantallen van de afgelopen twee jaar. Die zorgen voor een beduidend lagere aanname in de vruchtbaarheid.

## **5. De leerlingenprognoses**

In dit hoofdstuk worden de leerlingenprognoses van de verschillende scholen gepresenteerd en besproken. Een uitdraai van de tabellen behorende bij de leerlingenprognoses is te vinden in bijlage 3.

### **5.1 Gehanteerde methodieken**

Bij het opstellen van de leerlingenprognose is gebruik gemaakt van herkomstgegevens naar voedingsgebied.

Het belangstellingspercentage wordt gedefinieerd als “het percentage van de basisgeneratie uit een herkomstgebied dat naar een bepaalde school gaat”. De belangstellingspercentages zijn gebaseerd op de leerlingentellingen van 1-10-2018. Daarnaast is rekening gehouden met de ontwikkelingen op de korte termijn.

### **5.2 Prognoseresultaten in tabelvorm**

Een totaaloverzicht van de waargenomen en het geschatte aantal leerlingen per school is te vinden in de tabel op de volgende pagina.

Waargenomen en geschatte aantallen leerlingen per school

## Bijlage 1 Begrippen en afkortingen

### Begrippen- en afkortingenlijst voor de leerlingenoverzichten

Afkorting	Toelichting
bl%	Belangstellingspercentage per wijk
#bg	Aantal kinderen in de betreffende basisgeneratie in die wijk, of het aantal 4 en 5 jarigen, BG_0405, of het aantal 4 tot en met 11 jarigen plus 30% van de 12 jarigen
#ll	Het aantal leerlingen uit de wijk
ZZ-BRT	Optelling van de buurten die niet tot het directe voedingsgebied van de school behoren.
Opslag	Opslagpercentage voor leerlingen waarvan geen herkomstgegevens beschikbaar waren en/of afkomstig uit gemeenten die niet in de prognose van de basisgeneraties zijn meegenomen
Totaal BG_0405	Aantal 4 en 5 jarigen op de instelling
Totaal BG_0412	Totaal aantal kinderen op de instelling
